EU Login
Your guide to secure authentication

Are you using the safest multifactor authentication method when you log into EU Login? Set up the Trusted Platform Module in your laptop – it's easy and accessible. Then add a backup method to always have access to EU Login. Here's how.

Best Choice

Trusted Platform Module

The Trusted Platform Module (TPM) is a chip in your Commission laptop. To use it, authenticate with your biometrics or Windows PIN. Your laptop must be in WELCOME.
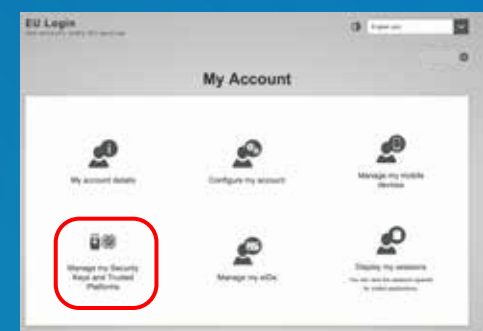

Step 1
If not done, set up your fingerprint or Windows PIN: Settings > Accounts > Sign-in options

Step 2
EU Login homepage -> Settings -> My Account -> Manage my Security Keys and Trusted Platforms -> **Add a Trusted Platform**

EU Login

EU Login app

This is a free mobile application you can download to your smartphone.

Step 1
Search for the EU Login app in the Google Play Store (Android) or the App Store (iOS) and download it.

Step 2
Open the app, tap on **Initialise** and accept the 'Allow notifications' request. Follow the instructions on the screen.

Security key

This is a plug-in device, available on approval from your DG's procurement team or privately.

Step 1
Set up your security key as per the manufacturer's instructions.

Step 2
EU Login homepage -> Settings -> My Account -> Manage my Security Keys and Trusted Platforms -> **Add a Security Key**

EU eID

eID

If your country has an eID system, you can use your ID card and a card reader.

Step 1
EU Login homepage -> Settings -> My Account -> Manage my eIDs -> **Link my eID**
